

Examples of Laboratory Science Pilot Projects

- Preclinical Evaluation of SLO101 for Ovarian Cancer – Deb Lannigan
- Regulation of Cytoplasmic Signaling in ER+ Breast Cancer – Peggy Shupnik
- Role of VCAM-1 in an Orthotopic Model of Ovarian Cancer – Jill Slack-Davis
- Targeting STAT5b in Breast Cancer – Corinne Silva

Examples of Clinical and Translational Pilot Projects

- Evaluation of the Impact of Obesity and Physical Activity on Endometrial Cancer – Susan Modesitt
- Evaluation of the Immunogenicity, T Cell Differentiation, and Lymphocyte Trafficking Potential Following Administration of a Peptide Vaccine in Breast Cancer – David Brenin and Kim Bullock
